Date

June 24-28, 1pm-4pm, Rising 2nd-6th

Cost

\$175

From the Astronomer...

The sky's the limit this week as your child will get to explore the world above them. From learning about constellations, planets, and lunar craters to our sun's surface, exploring light diffraction, and building our own water rockets! Campers will also have the opportunity to retrace Galileo's footsteps and explore the universe as he did – through the lens of a simple, refracting telescope that's easy enough to assemble in camp, yet powerful enough to see all that lies above.

My name is Anadi Nava. I was born in Anaheim, CA and my family moved here to Winterville, NC in 2007. We love it here and feel like this is our home and wish we would have moved sooner. My husband and I currently have two children, Kailey and Kalan, at CCS. I love teaching Spanish to our Upper School kids and then in the afternoon I am

blessed to join the Lower School and help with kindergarten. We have a little zoo in our house. We have two ferrets, four chinchillas, three cats and we recently added a dog to the mix. We love to travel as a family and explore places we have never been before. I look forward to having your children be a part of my summer camps.

Did you know?

A FULL NASA SPACE SUIT COSTS \$12,000,000.

While the entire suit costs a cool \$12M, 70% of that cost is for the backpack and control module. However, the space suits that NASA uses were built in 1974. If these were priced by today's pricing, they would cost an estimated 150 million dollars!
